

How to export a list of flights in Skylegs and import it in the Crewing Tool

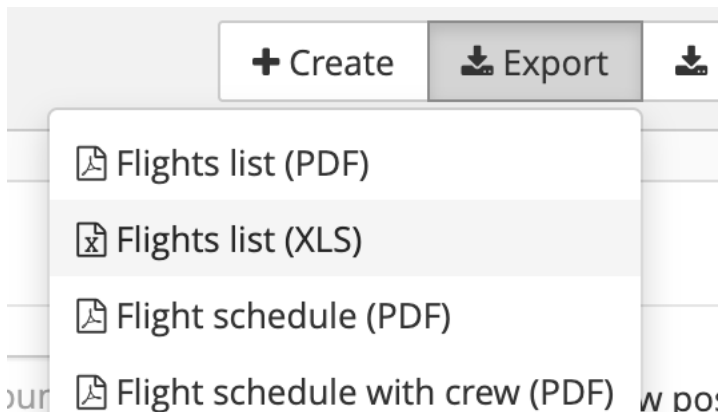

In Skylegs: use tab “operaties” – “flights overview”

The screenshot shows the 'Flights overview' page in Skylegs. The left sidebar contains navigation links: Dashboard, Planning, Operaties (highlighted), Training, Compliance, and Maintenance. The main content area has a top bar with '+ Create', 'Export', 'ETS reports', 'Filter', and 'UTC'. Below this, the 'Filter by resource' section includes date range (01/10/2026 to 31/10/2026), Direction (Ascending), Organisations, Flight Cat., Mission Cat., Airport Cat., With tags, and Without tags. The 'Aircraft' section lists PH-DWA, PH-DWC, PH-DWP, PH-DWS, and PH-JSK. The 'Departure / Arrival' section includes Country, Departure, Arrival, Airport, and City pairs. The 'Other' section has checkboxes for Show post-flight data, Show deleted, Show tags, Show related clients, Only completed flights, Only empty flights, and Only homebases. An 'Apply filters' button is at the bottom right.

Set filter as follows:

- Select date range (in figure here: 1/10/2026 until 31/10/2026)
- Ascending
- Aircraft: select: DWA-DWC-DWP-DWS-JSK

Click “export”

Select “Flights list (XLS)”

This will generate an XLS that you can use straight away in the crewing tool:

In the **mission planning tab**: click “upload” and selected the .XLS that you generated in Skylegs

⚙️

Mission planning

Plan demand on a calendar before aircraft are assigned. Click an empty time slot to create a mission, click a mission to edit it.

Timeline **Load XLS** Table

Load mission XLS

Load a flight-export Excel file. It is converted automatically to the mission format and validated first. If it contains reference dataset and add them automatically.

Current mission source: **flights-OCT.xlsx** · 154 missions

Flight-export Excel file

📁 Upload

200MB per file • XLSX, XLS

Use uploaded XLS

The system checks validity, adds extra unknown airports if needed. Click “Use uploaded XLS” to be able to use it.

How to export Pilot agenda's in Skylegs and import it in the Crewing Tool

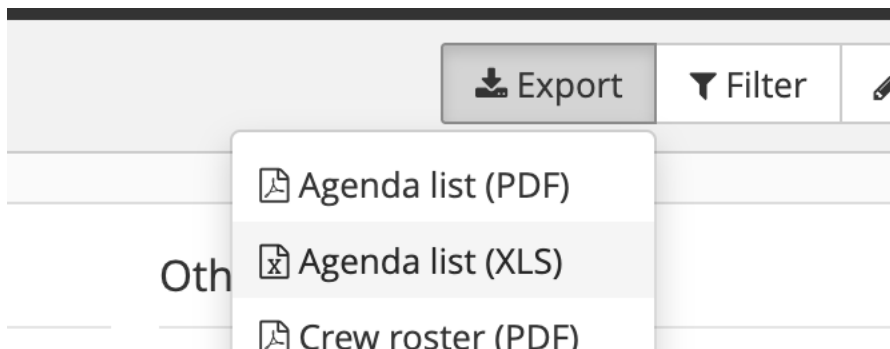

In Skylegs: use tab “operaties” – “Agendas overview”

Set filter as follows:

- Select date range (in figure here: 1/10/2026 until 31/10/2026)
- Roles: select: Crew EMB135/145

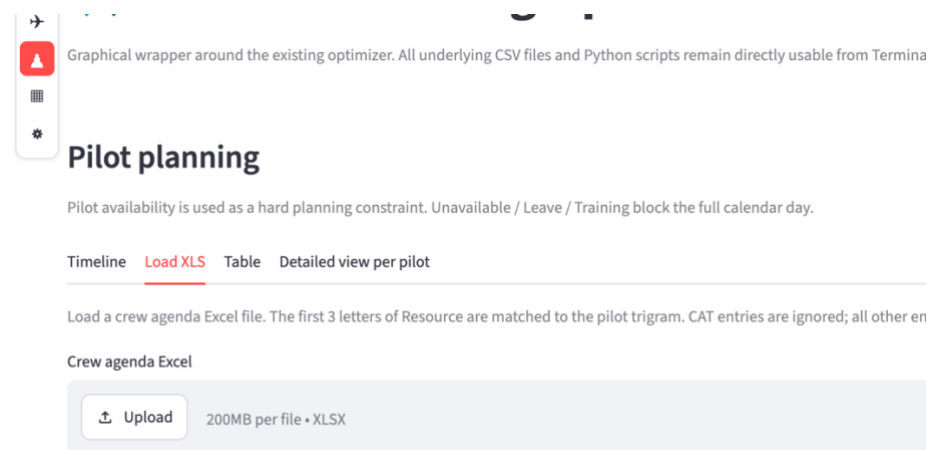

Click “export”

Select “Agenda list (XLS)”

This will generate an XLS that you can use straight away in the crewing tool:

In the **pilot planning tab**: click “upload” and selected the .XLS that you generated in Skylegs

Timeline

Load XLS

Table

Detailed view per pilot

Load a crew agenda Excel file. The first 3 letters of Resource are matched to the pilot trigram. CAT entries are ignored; all other entries block the full calendar day.

Crew agenda Excel

agenda-OCT.xlsx

107.7KB

Ignored unknown crew trigrams: CHE, DBO, JUD, LVP, NBE, OHE

Valid crew agenda: 213 blocked pilot-days for 14 pilots.

pilot_id	date	status	note
C01	2026-10-01	UNAVAILABLE	Rather Not - Flight Instructor Refresher Course
C01	2026-10-02	UNAVAILABLE	Rather Not - Flight Instructor Refresher Course
C01	2026-10-05	UNAVAILABLE	CBT Duty - "Planned initially by Training. Can be rescheduled by crewing if require
C01	2026-10-08	UNAVAILABLE	General
C01	2026-10-09	UNAVAILABLE	Local day off
C01	2026-10-10	UNAVAILABLE	Local day off
C01	2026-10-11	UNAVAILABLE	Local day off
C01	2026-10-13	UNAVAILABLE	Office duty - TM Team FRAW

The system checks validity, it also disregards cabin crew for now. The unavailable days per pilot are now added in the crewing tool.

How to calculate a full mission plan with the Crewing Tool

Go to the “Optimizer” page. The basic mode has everything you need. Click “start optimization”.

You will see text appearing in the live terminal with some information. For complex schedules these calculations can take a few minutes.

When the calculation is DONE, it is mentioned below.

The screenshot shows the "Run optimizer" application window. On the left is a vertical sidebar with icons for a menu, navigation, user profile, settings, and a gear icon. The main area has a title bar "Run optimizer" and two tabs: "Basic" (selected) and "Advanced". Below the tabs, it says "Quick run: 2 independent runs · population 100 · 10 generations". There are three buttons: a red "Start optimization" button, a light blue "Optimizer idle" button, and a greyed-out "Stop optimizer" button.

Mission planning board

Default view: CHEAPEST. The planning canvas now contains the full horizon: scroll horizontally/vertically, use Cmd/Ctrl + wheel to zoom, and click any card for crew, timing and operational details.

Navigation: Previous solution | Next solution ▶ | 1 | - | + | 3 saved unique schedules - alternative #1

Backup coverage - 3 shortage units

Summary: €97,800 Total cost | 24 Complexity | 0 Empty legs | 163 Pilot-days | 5 Outstation swaps

CHEAPEST UTC - one row per aircraft - horizontal position = actual time

Start - 36% + Fit
